BMW S54 KIT

Performed by **SADEV**

SADEV SEQUENTIAL KIT UPGRADE FOR YOUR S42, S50, AND S54 BMW ENGINES.

PUT ALL THE CHANCES ON YOUR SIDE TO WIN !

After my second season racing the SADEV SCL924, I couldn't be happier. The durability is incredible.

We still have not needed to change out any gears or dog rings. The sequential shift means I never have to second guess my shifts. No more sketchy 3rd to 2nd cross-gate downshifts.

- SADEV paddle shift capable
- Custom input shafts available

SADEV ACCESSORIES AVAILABLE IN OPTION :

- Paddle-shift
- Gear display

Weight of the kit components (excluding gearbox weight) : 8 Kgs / 17,6 lbs

« The SADEV 924 transmission is one of the biggest upgrades you can make to your car. Not only are the shifts lightning fast but the gearing is spot on and keeps the engine right in the sweet spot of the power band, making the car feel like it picked up 100hp! I couldn't be happier with my SADEV transmission !»

MIKE DUSOLD

« When it came time to update our race truck, we knew that one of the biggest improvements would be changing from a standard H pattern to a sequentially shifted transmission. The Sadev SCL924 was the perfect choice since it was not only compact and light weight, but would drastically improve our shift times and overall lap times. With the use of the optional paddle shift system, we are now able to keep our hands on the wheel and have sub 50 millisecond shifts.»
