

SCL924

ADAPTOR KIT

NASCAR

Performed by **SADEV**

SADEV SEQUENTIAL KIT UPGRADE FOR YOUR NASCAR ENGINE PLATFORM.

JACK RINKE
TURN KEY MOTORSPORTS

Our SADEV transmission has proven to be one of the best transmissions we've used on our racing program.

Our place on the podium wouldn't be possible without the consistency, durability, and smoothness of our Sadev SCL924LT. I would urge anyone looking to make the jump to sequential transmissions to make the jump with SADEV.

”

ENHANCE YOUR PERFORMANCE WITH THE SCL924 SEQUENTIAL KIT UPGRADE FOR NASCAR !

Enhance your driving experience and performance with the SCL924 NASCAR kit. With the NASCAR Adaptor kit, SADEV provides you a **bespoke solution**, ready to be used for optimum performance and to have the best chances of winning.

OPTIMISED WEIGHT

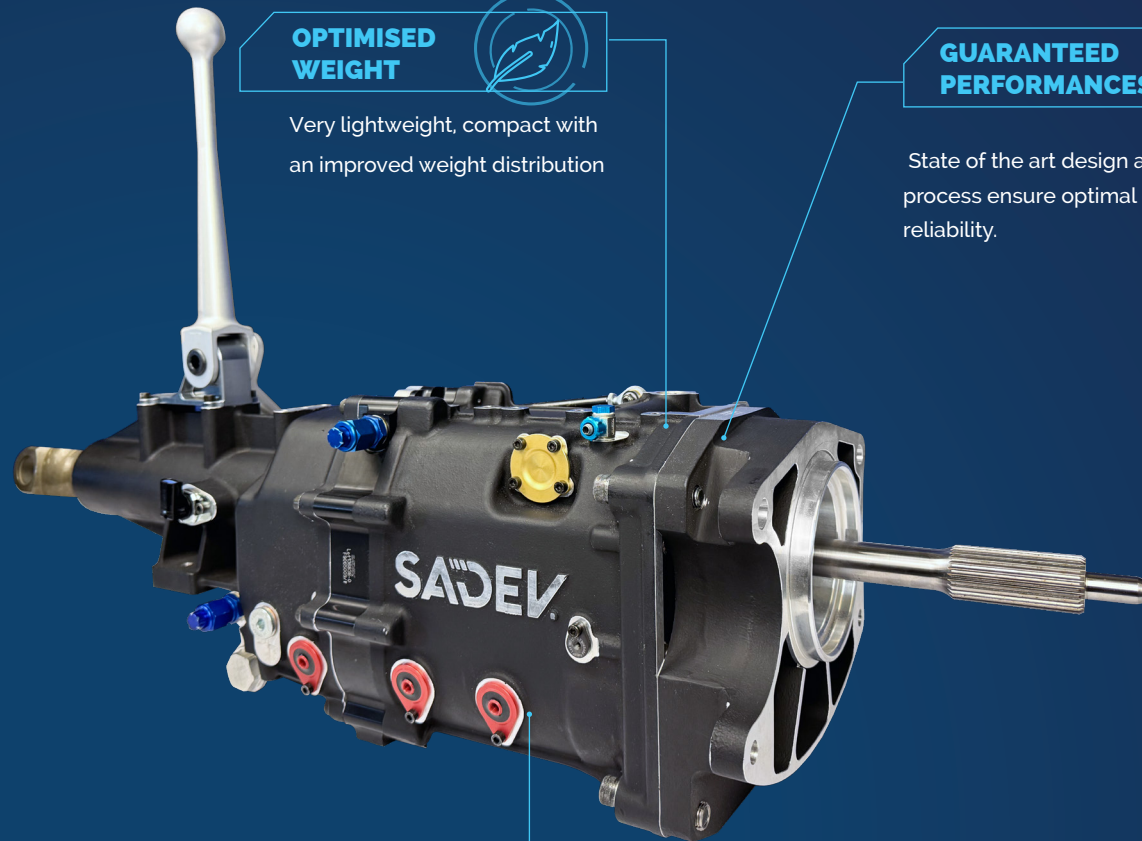

Very lightweight, compact with an improved weight distribution

GUARANTEED PERFORMANCES

State of the art design and manufacturing process ensure optimal efficiency and reliability.

CUSTOMIZED RATIO CHART

The interchangeable drop gears and a large selection of gear ratios allows you to tune the gearing to your specific needs. You are no longer limited by the 1:1 in 4th gear.

KIT CONTENTS

ADAPTABILITY OF THE KIT

- The NASCAR adaptor kit allows the SCL924 to bolt directly to your existing NASCAR bellhousing and clutch setup.
- The transmission centering diameter is available in both the FORD and the DODGE / GM / TOYOTA versions. Input shaft options are either 26, or 29 splines.

SADEV ACCESSORIES AVAILABLE IN OPTION :

- Paddle-shift
- Gear display

Weight of the kit components (excluding gearbox weight) : 4,5 Kgs / 10 lbs

“
« I've driven many different road race cars with various transmission setups throughout my racing career. The SADEV sequential stands out for its precision, it makes every shift effortless and exact, helping me hit my braking points consistently and improve lap times. The upshifts and downshifts are seamless, allowing me to stay fully focused on everything else happening in the cockpit.»

TODD NAPIERALSKI
TRANS AM DRIVER

“
« The SADEV transmission in our FR9-powered roadster delivers exceptional reliability and performance, achieving over 200 MPH at El Mirage and Bonneville. It offers clean, lightning-fast shifts at 9,800 RPM, improving acceleration and driver control. Requiring less concentration than traditional gearboxes, it enables smoother shifts and about 300 feet more acceleration at El Mirage. Its precision and dependability are key as we prepare for competition on Australia's dry lakes.»
