## LT T56 MAGNUM REPLACEMENT KIT

Performed by **SADEV**

### THE ULTIMATE SADEV SEQUENTIAL TRANSMISSION TO REPLACE YOUR H PATTERN TREMEC.

**JASON BOTTENFIELD**  
2021 OPTIMA CHALLENGE CHAMPION

Since installing my SADEV SCL924 (Long Tail) T56 replacement; my on-track gains have been immediate.

The custom gear ratios and no lift upshifts are a game changer coming out of corners. Equally... the confidence I gained coming down multiple gears and late braking into corners has been a huge advantage. If you are chasing faster lap times and increased late braking confidence... You need a SADEV.

### ENHANCE YOUR DRIVING EXPERIENCE AND PERFORMANCE WITH THE SCL924 LT T56 MAGNUM KIT !

Switch from your traditional T56 Magnum, H pattern transmission to a SADEV high performance 6 speed sequential transmission with interchangeable gear ratios. With the LT T56 Magnum replacement Kit, SADEV provides you a **bespoke solution**, ready to be used for optimum performance and to have the best chances of winning.

#### OPTIMISED WEIGHT

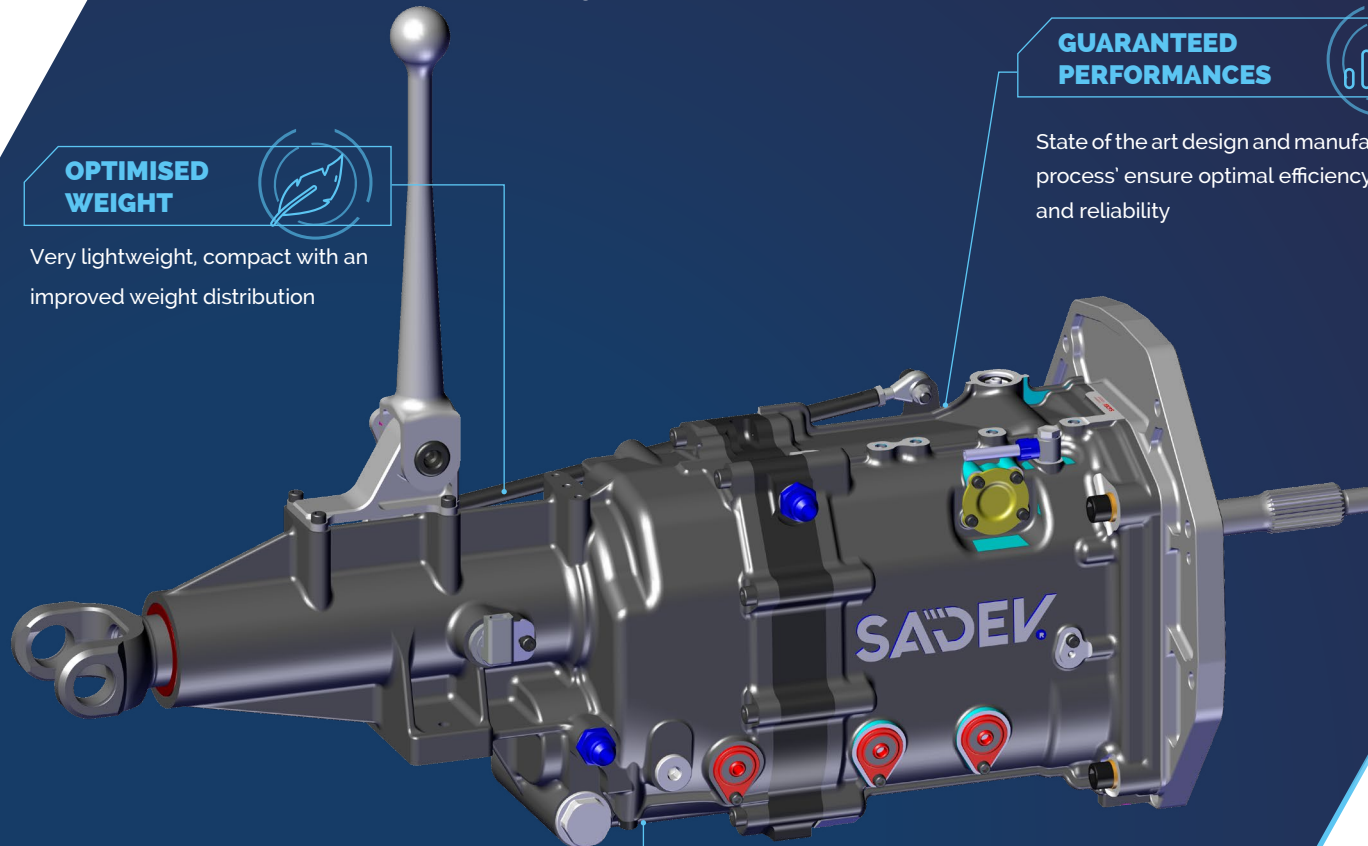

Very lightweight, compact with an improved weight distribution

#### GUARANTEED PERFORMANCES

State of the art design and manufacturing process' ensure optimal efficiency and reliability

#### CUSTOMIZED RATIO CHART

The interchangeable drop gears and a large selection of gear ratios allows you to tune the gearing to your specific needs. You are no longer limited by the OEM ratio options.

- With 8 different gearlever positions you can adjust to your comfort

#### SADEV ACCESSORIES AVAILABLE IN OPTION :

- Paddle-shift
- Gear display

Weight of the kit components (excluding gearbox weight) : 4 Kgs /9 lbs

As a race car builder and driver, I've had the opportunity to test a lot of different driveline setups over the years, and the SADEV sequential transmission stands out as one of the best I've ever used. The precision and feel of each shift are absolutely top-notch — crisp, consistent, and confidence-inspiring every time I'm on track.

From an installation standpoint, the SADEV fits beautifully into our Turn Key Automotive road race builds. The engineering behind it makes integration straightforward and clean, with everything lining up exactly the way it should. Our customers love the performance, and I personally enjoy how intuitive and responsive it is under hard driving conditions.
